

CalendarStar™

CalendarStar™ is a web-based calendar system specifically designed for use by groups. It's powerful enough to handle sophisticated business management applications, but at the same time it's easy to use for small organizations like churches, clubs and families.

Keep everyone on the same page by posting your organization's calendar on the internet!

Now your organization can schedule Events and meetings quickly and easily over the internet. There's nothing to install, and never an upgrade fee. **CalendarStar™** operates over the internet using your Microsoft Explorer® or Netscape® browser.

Whether your calendar information needs to be shared only within your group or with the whole world over the internet, many organizations are challenged to manage this sharing process. This is especially true if the group relies on volunteers or a webmaster, or if leadership changes from one year to the next. **CalendarStar™** is a convenient solution to organize your group for the long run.

All calendar information is securely stored on our servers, and we use the same kind of security your bank uses to protect your checking account. Your organization will define who has access to view your information on the **CalendarStar™** system.

- **Public / Private Access** – share information with everyone in the group, or create public and private views of the same calendar.
- **Create a Link** – launch **CalendarStar™** seamlessly from an existing web site.
- **Flexible administrative capabilities** – create multiple calendar views with full control over who can see, and who can edit the calendar.
- **Categories** – categorize similar events with this powerful facility. **CalendarStar™** allows you to define Categories such as, public events, private activities, board meetings, committee project schedule...whatever your group decides to make them. Customize color selection and each category of events stands out clearly.
- **Real Time Updates** -- Complete a simple form with the name of the Event and date it will occur. Add optional detail information such as location, category, start and end time, contact information and special notes. Click "Submit" and the data is instantly in your calendar for all authorized users to view.
- **Recurring Events** – post recurring events with a single entry. It's powerful and it's easy!
- **No Limits** – assign any number of UserIDs, Categories and Events. No matter how big or busy your group, **CalendarStar™** will help keep you organized.
- **Easy to Use** – our customers rave about how **CalendarStar™** is easy to use.

Star-Tech provides robust web-hosted calendar and contact management tools for the business and home user. Call us for a quote today. You'll be pleasantly surprised that **CalendarStar™** is very affordable.
